## Summary

If I remember correctly these are 1/2" irrigation fittings.

[Household](#) > [Outdoor & Garden](#)

Tags: [landscape](#) [irrigation](#) [connectors](#) [fittings](#) [grass](#)  
[lawn](#) [yard](#) [connections](#)

You definitely need to print these in ABS or another plastic that holds up well outside. The valve needs 3 rings to function properly without it, and will leak.
